

GUARDIAN 5 SC

Botanical Fungicide - Bactericide
Liquid Soluble Concentrate CS

Ingredient	Percentage
Extract of Equisetum arvense	5.0%
Additives (Extract of Saccharum officinarum)	15.0%
Inert ingredients	80.0%

- Delivers phytochemicals from plant extracts of Equisetum arvense and Saccharum officinarum to manage diseases caused by fungal and bacterial pathogens.
- Acts by inhibiting the growth of fungi and the replication of bacteria, preventing infectious processes.
- Strengthens the plant with nutrients while minimizing damage from fungal and bacterial diseases.
- An organic input that can be used in both conventional and sustainable agriculture.

CROP	PATHOGEN	DOSE
Vegetables Tobacco Citrus Cocoa	<i>Phytophthora sp.</i>	1.0 - 3.0 L/ha

Dosage calculated in 200 L of water.

ADDITIONAL INFORMATION

- GUARDIAN 5 SC is compatible with most common fertilizers, adjuvants, and pesticides; however, it is advisable to conduct phytotoxicity tests for new mixtures and crops.
- Store at temperatures ranging from 4°C to 42°C.
- Keep the product in its original, labeled, and sealed container.
- For more information on its uses and applications, consult a company agronomist.
